**0.95** Mt  
CO2 Consumption

**76.5K** tonne  
Waste Generation Saved

**138K** M3  
Wood Saved

# ASSET POOLING FOR EFFICIENCY AND IMPACT

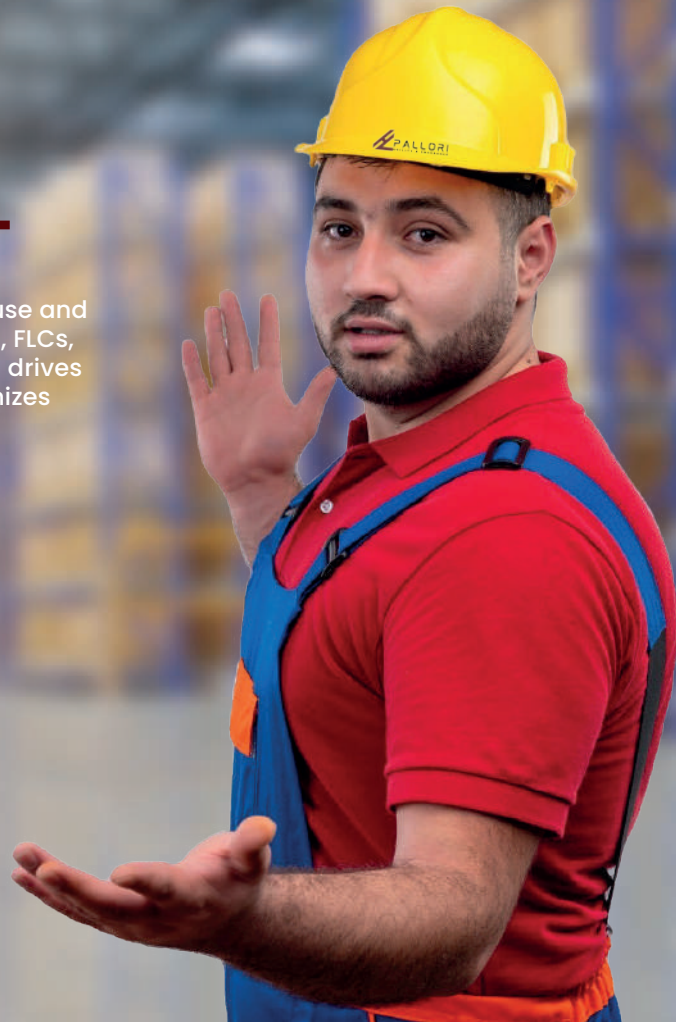

As practiced by Pallori India, asset pooling involves the shared use and reuse of essential supply chain materials such as pallets, crates, FLCs, and more among multiple customers. This innovative approach drives significant cost savings, enhances operational efficiency, minimizes waste, and contributes to a more sustainable environment.

## Movement Hire Model

Assets are given on rent, letting the customers use them to connect all legs of the supply chain which includes RM/PM > Manufacturer > 3PL > Retail thus helping reduce the asset relocation cost.

## Static Hire Model

Assets are hired for Stationary Storage of its products.

## THE PALLORI ADVANTAGE

- CAPEX TO OPEX
- Largest network of Asset Pooling in the country
- Quality and Innovation in Supply Chain Solutions
- End-to-End movement of products
- Dedicated Automotive business vertical
